

# S/4HANA Integration: Fiber Rope, Mountain Sports' goes live

Well fit for the future with the extensive use of **S/4 MILL Cable Solution, embedded PP/DS**, and full integration into **SAP S/4HANA**.

Teufelberger, headquartered in Wels, Austria, is a leading global manufacturer of ropes. The company operates production sites across the EU, the USA, and Thailand. Its product portfolio includes fiber ropes, steel wire ropes, and strapping. Teufelberger's solutions are used in various applications, such as steel wire ropes for cable cars, cranes, and forestry, as well as synthetic fiber ropes for sailing, personal fall protection, tree care, and industrial use. Additionally, the company produces synthetic strapping for transport safety.

Teufelberger's project objective, "**Manage Complexity**," aimed to enhance transparency across the entire supply chain. This involved integrating logistics and procurement processes into both inbound and outbound logistics. Additionally, batch-specific production was to be incorporated into product costing and material valuation, while capabilities for deviation analysis in controlling were to be expanded. The first phase also included the go-live of the mountain sports segment for climbing rope manufacturing.

# Successful implementation of variant configuration to manage Teufelberger's dynamic product range, fully integrated into planning and execution with CDP

## NEXT STEPS:

- Integration of additional segments into the S/4HANA landscape
- Further development of the supply chain processes including S&OP, aATP with SBC, and Supply Protection

## PROJECT BENEFITS FOR TEUFELBERGER:

- Enhanced transparency across the entire supply chain
- Integrated and optimized processes
- Capacity and S&OP simulation with seamless transfer to detailed production planning and execution
- Comprehensive implementation of variant configuration to manage Teufelberger's dynamic product range, integrated into planning and execution with CDP (Characteristic Dependent Planning) as the foundation for future segments

„CONSILIO demonstrated exceptional expertise and know-how. With their support, we successfully achieved a smooth production start in the 'Fiber Rope Mountain Sports' segment. CONSILIO guided us through every phase of process optimization, significantly enhancing transparency across our entire supply chain—positioning us well for the future.“
